

European culture, language  
and identity in a new world

Comenius 1 - school partnership project

## Bucharest meeting – students' work session

### Introduction of work period about shopping habits

Have you noticed, we have arrived in the working world, which is one of our topics within the project this year. Our working world and economy is strongly influenced by globalization, but not only the working world. Globalization affects all of us. Every day we face the influence of globalization on our language – especially English, on our culture – think about international films, Mac Donald's, music,... . We can particularly see globalization in our daily life when we go shopping. Nowadays we can buy products from all over the world, we have the same chain stores like H&M, Zara or IKEA, we work in international companies, we are part of a global economy.

Today we are going to deal with the consumers and their shopping habits, in the afternoon we will work on the effects of globalization on the European and American economies. You have collected information and pictures of the weekly shopping of one family. We will give you some (10) minutes now to get prepared for your presentation. After the presentations we will work in groups and compare our national shopping habits. Then we will have lunch.

→ *Power-Point-Presentation*

### Presentation of shopping habits

Schools present their results in alphabetical order.

### Group work about shopping habits

Formation of groups:

Make a big circle / the persons next to you must be persons of different nationalities. Okay, now back to work. We will make groups of six students each.

### Task for international groups:

Cf. work sheet

\_ Please write down your results on the large sheet of paper you will get and keep in mind that we will take a picture of it and put it on our website.
